

Solubility curve

From Crystal growing

Main article: *Solubility*.

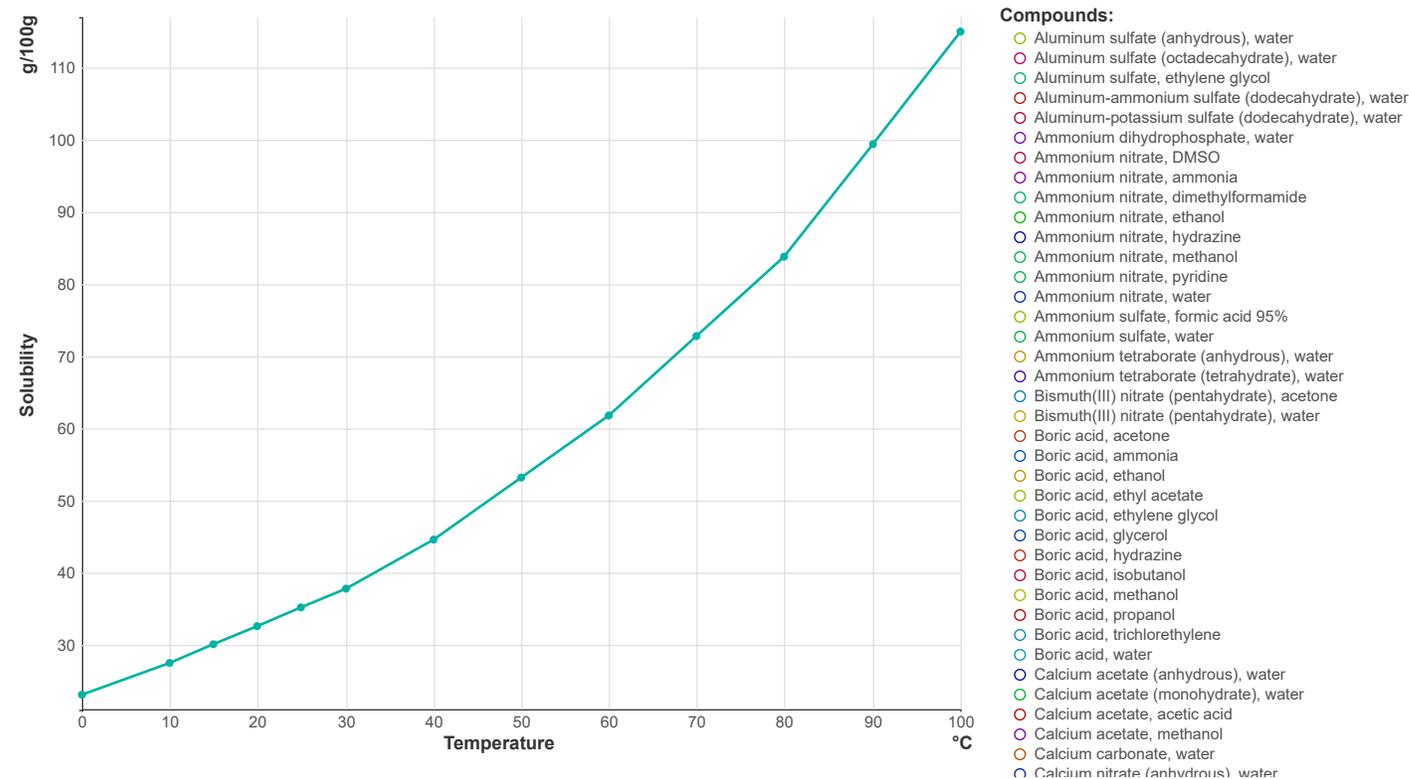

Related article: *Solubility table*.

Related article: *Solubility curves*.

There you can find solubility data of all compounds from the project in different solvents.

Graph controls:

mouseover/tap on points of curve - show the exact solubility data from the reference
mouseover/tap on a curve - show the interpolated solubility data
double click/double tap on curve - off certain solubility curve
click on compound name - on/off certain curve
click on legend title - on/off all the curves
click on axis name - scaling from 0 to max value
click on units name - change units and recalculate the data:
Solubility: grams of compound per 100 grams of solvent <=> % of solvent mass,
Temperature: °C <=> °K <=> °F <=> °Ra
